

YOUR HELP IS NEEDED BECAUSE:

- Hemophilia is an inherited bleeding disorder. There is no cure.
- Many persons with hemophilia are also infected with hepatitis or HIV/AIDS.
- Hemophilia care may cost \$150,000 - \$300,000 a year and in some cases \$1,000,000 or more; treating HIV or AIDS adds to these costs.
- Many persons with hemophilia may eventually require joint replacement surgery, a result of bleeding in the joints.
- Persons with hemophilia and their families have significant needs.
- The Foundation is the only agency serving those with bleeding disorders.

Your support helps provide education, special services and programs such as hemophilia summer camp for children, teen retreats, counseling, financial assistance, and more. Please join us so that persons with hemophilia and hemophilia/HIV/AIDS can live as normal a life as possible. Thanks for your help!
